

Professional hydraulic lift bonsai turntable

We are finally pleased to announce the arrival on the European market of one essential tool that will help the bonsai enthusiast of every level to work more efficiently and comfortably on their trees. In Japan everyone has always been using hydraulic lift turntable, but their prohibitive costs have limited their spread in the west. Thanks to the researches and the collaboration of well-known professionals in the bonsai world, we are able to offer you a tool inspired by the Japanese conventional table but improved in several details.

Why choose **Green T** you may ask ? , because **Green T** is:

Bigger

The board is **23** in diameter instead of the usual 20 in allowing you to work the most impressive materials as well as the smallest trees. You can comfortably use the exceeding space to have your tools easily accessible next to your bonsai.

Stronger

the board is made out of **phenolic marine plywood** of pine which is painted and coated in solid non slip rubber (0,16 in thickness Shore A hardness 70).

Lifting capacity up to **440 lb**. Tightening screws and threaded bushes are completely made from stainless steel. All the materials used in the construction of **Green T** guarantee an excellent **outdoor weather resistance**

Useful

metal base with 5 star support and hydraulic pump lift by foot control. Adjustable height of the bearing surface (**Basic** model: minimum **17** in. - maximum **24** in.) The swing brake of the table can be disconnected with a simple movement of the pedal. **5** removable **eye screws**, located in the lower part of the work plan, allow a solid anchor of the bonsai to the table.

Lightest

While having superior characteristics to a Japanese turntable, **Green T Basic** has the same weight of its Japanese competitors: **33 lb**.

Cheaper

Green T Basic is offered at a price of **US\$ 385,00** , shipping and handling with courier throughout US market all included: about **half the price** of a Japanese imported turntable.

....from today **Green T** is also.....

more **Versatile** thanks to the new options:

Green T **Plus** model

Equipped with an innovative hydraulic lifting pump with pedal control and telescopic cylinder *, this new work table model guarantees greater lifting excursion compared to the **Basic** model, reaching a maximum height of the work surface of **82 cm.** off the ground. **Green T Plus** will definitely be appreciated by everyone dedicated to working on medium to small sized bonsai. Our strength lies in containing the cost, even if a professional product with no market competition, reflect our philosophy of offering bonsai enthusiasts at all levels an indispensable work tool at an accessible price.

* utility model pending

Green T **Plus** model
